## Outer Joins Exercise

1. Select All position descriptions and the staff ID's that are in those positions

2. Select the Position Description and the count of how many staff are in those positions. Returnt the count for ALL positions.
HINT: Count can use either count(*) which means records or a field name. Which gives the correct result in this question?

3. Select the average mark of ALL the students. Show the student names and averages.

4. Select the highest and lowest mark for each student.

5. How many students are in each club? Display club name and count.
